<p>6. Description of content: This draft of Egyptian standard specifies methods for the determination of:</p> <ul style="list-style-type: none">• The design loads and design stresses on rig elements; and• The loads and scantlings of rig attachments and mast steps/pillars; on monohull and multihulls sailing craft. <p>It also gives, in Annexes, "established practices" for the assessment of mast steps/pillars or chainplates.</p> <p>Scantlings derived from this draft standard are primarily intended to apply to recreational craft, including charter vessels.</p> <p>This draft standard is not applicable to racing craft designed only for professional racing.</p> <p>It only considers the loads exerted when sailing. Any loads that may result from other situations are not considered in this draft standard.</p>

<p>Throughout this draft standard, and unless otherwise specified, dimensions are in (m), areas in (m²), masses in (kg), forces in (N), moments in (N m), stresses and elastic modulus in N/mm² (1 N / mm² = 1 Mpa). Unless otherwise stated, the draft is assessed in fully loaded ready for use condition.</p> <p>Worth mentioning is that this standard adopts the technical content of ISO 12215-10:2020</p>
<p>7. Objective and rationale, including the nature of urgent problems where applicable: Safety requirements; Quality requirements</p>
